                                                        a confirmed positive because, number one,

                                                         we knew then 100 percent with certainty,

                However, given the fact that we

                                                         and it wasn't just a grave concern, but
23
                                                         there was clear evidence that there was
